A. *adj.*

1. Motionless; not moving from one place, stationary; also, remaining in the same position or attitude, quiescent. **a.** as *predicate* or *complement*.

In *stand, sit, lie still* the word may be taken either as adj. or adv. In OE, however, there is evidence that in these collocations it was sometimes adv., and no evidence that it was ever adj, the constant form being *stille* (which always admits of being regarded as adv.), never *stilli*, which would be the proper form of the adj. when the subj. is fem. sing. or neut. pl. Further, in OS. and OHG. the adv. *stillo*, not the adj., is used with the verb 'to stand'. These phrases are therefore treated under Still *adv.* 1.

VI. A fund, store.

The senses grouped under this head are not found in the other Teut. languages except by adoption from English. Their origin is obscure, and possibly several different lines of development may have blended. Thus the application of the word to a trader's capital may partly involve the notion of a trunk or stem (branch I) from which the gains are an outgrowth, and partly that of 'fixed basis or 'foundation' (branch II): cf. Fund. Sense 47 may be derived immediately from that of 'money-box', and have given rise to uses coincident with senses of different origin. The application to cattle is primarily a specific use of the sense 'store', but the notion of 'race' or 'breed' (sense 3) has had some share in its development.

52. The subscribed capital of a trading company, or the public debt of a nation, municipal corporation, or the like, regarded as transferable property held by the subscribers or creditors, and subject to fluctuations in market value. Also, in particularized sense, a kind of stock, a particular fund in which money may be invested.

In expressions like *to buy or sell stocks*, the word may be partly an application of sense 42, 'tally'. Cf. quot. 1714 under that sense.

In modern British use the application of the word is narrowed; the subscribed capital of a public company is called *shares* when it is divided into portions of uniform amount, and *stock* when any desired amount may be bought or sold. In British use, also, when there is no specific indication, *stock* is usually taken to refer to those portions of the National Debt, the principal of which is not repayable, the government being pledged only to the payment of interest in perpetuity.

Stole (stōul), *sb.*[2] Also 5-6 stoole, 6 stoolle, stowle. [Commonly identified with STOLE *sb.*[1], to which the unauthenticated sense of 'royal robe' is assigned. But there seems to be little doubt that the 'stole chamber', served by the Groom or Yeoman of the Stole, was originally the room containing the king's close-stool, and that the word is properly a variant of STOOL *sb.*[1] As, however, the word as thus used was for centuries entirely dissociated from *stool*, and latterly had a different spelling, it is necessary to treat it separately.

In accounts of coronation ceremonies the king is said to have worn an ornament resembling a stole (STOLE *sb.*[1] 2); but it does not appear that this was actually *called* a 'stole' until modern times. The view that the Groom of the Stole derived his designation from this ornament is quite improbable.

Sir H. Nicolas's supposition, that the 'stole' was a kind of packing-chest, is a mistaken inference from the *stole* and *male* being mentioned together in certain documents.]

Stomacher[1] (stʊ·măʃəɹ, stʊ·măkəɹ). Forms: 5 **stomakere, stomechere, stomachyr**, 5–6 **stomachere**, 5–6, 8 **stomager**, 6 **stomackger**, (8 **stomatcher**), 6– **stomacher** [app. f. Stomach *sb.* + -er 1: but see below.

The alleged F *estomachier* appears to be recorded only by Palsgrave. If it be genuine, and the source of the Eng. word, it would account for the pronunciation (stʊ·măʃəɹ), which is given in the pronouncing dictionaries of Kenrick (1773), Sheridan (1780), Walker (1791), Smart (1836), Worcester (1860), in Cassell's *Encyclopædic Dict.* (1888), and in *Webster's Dict.* (1828–1886). The genuineness of this pronunciation is attested by the spellings *stomager* (1450, 1727), *stomackger* (1575), *stomatcher* (17–), and *stomacher* (*c* 1450 onwards): the spelling with *k* is evidenced only once (*c* 1466), though the word occurs frequently in writers who wrote the word *stomach* with *k*. The pronunciation (stʊ·măkəɹ) was given by Ogilvie *Imperial Dict.* (1850) and appears in later editions of that work and in recent U. S. dicts. It is not impossible that *estomachier* was really formed in late Anglo-French, and is the source of the Eng word For the sense of the misuse of *stomach* for 'chest' (Stomach *sb.* 3).

b. In Great Britain from about 1850, the word has been current in the designation *co-operative store*, denoting the shop in which a co-operative trading society exposes goods for sale (originally to its own members only, but now usually also to the outside public). Story, *sb.*[2], **storey** (stōe·ri). Pl. **stories, storeys.** Forms: 5 **storye**, 6 **storie**, (**storrie, store**), 7– **storey**, ? 4, 5– **story.** [First in AL. form *historia*; hence prob. the same word as Story *sb.*[1], though the development of sense is obscure.

Possibly *historia* as an architectural term may originally have denoted a tier of painted windows or of sculptures on the front of a building: see Story *sb.*[1] 8, and cf. the Latin quot. 1398 below and sense 2.

The current view that the word is a. OF. **estoree* (f. *estorer* to build, furnish: see Store *v.*) is untenable on account of the AL. form *historia* (from 12th c.).

The following are examples of the Anglo-Latin use of *historia* in the architectural sense:—

1. Each of the stages or portions one above the other of which a building consists; a room or set of rooms on one floor or level.

In this use synonymous with Floor *sb.* 5; but while in England the term First-floor is applied to the floor above the ground floor, the numbering of 'stories' (so named) usually begins with the ground floor, so that the 'first-floor' is identical with the 'second story,' and 'a house of one story' has a ground-floor only. A different usage is shown in quot. 1850, and appears to be not wholly obsolete.

Quot *a* 1400, though the reading is app. the scribe's conjectural emendation of an obscure passage, may perh. be taken as attesting the existence of the sb. at the date of the MS.; the passage was prob supposed to refer to the addition of 'stories' or upper stages to towers.
